## Diphtheria

Disease complications:  
suffocation, pneumonia

## Tuberculosis

Disease complications:  
meningitis, growth, developmental disability

## Whooping cough

Disease complications:  
pneumonia, seizures, death

## Vaccines protect lives

Over the last 50 years in Europe,  
vaccines have saved **400 lives every day**.\*

That is **15 classrooms daily** of children who have  
the chance to play and learn and grow up healthy.

**Your child needs all their vaccines to be protected.**

Make sure they are up to date. Talk to their doctor.

## Get vaccinated: get protected
